

# SACRED GEOMETRY

a *Academy Sacred Geometry* event

with *Michael Rice - Architect*  
and *Nicholas Kelly - Computer Scientist*

**Part ONE JUNE 10-16th, workshops**

**Part TWO: June 17-21, tour**

**Booking: [www.AcademySacredGeometry.com](http://www.AcademySacredGeometry.com)**

## Practical Applications Workshop

This master class workshop focuses on the applications of sacred geometry to design, architecture, graphic, landscape and interior design. Day 1-2 is in a classroom environment where principles, practical examples and applications of sacred geometry to all aspects of design are presented. From the initial states of inspiration and imaging to the developed design and presentation.

Days 3-4-5-6 is an intense building master class which is a practical hands-on experience developed to demonstrate how to build a structure based on sacred geometry. In this workshop a sacred structure will be designed and built from start to finish, under the tutelage and expert guidance of a master geometer/builder. Particular attention and emphasis is being paid to show how to optimize building with curves and other natural forms.

This workshop is ideal for framers, builders, developers, architects, designers, as well as interested folk who want to discover the fastest and most optimal methods of building sacred architecture and creating sacred space.

This is a 6 day retreat, and then a sacred site tour of Ireland is held from JUNE 17-21, All details [www.AcademySacredGeometry.com](http://www.AcademySacredGeometry.com)

*"It was an incredible experience to be involved in the design and the actual building of a sacred geometry based structure. I saw from start to finish how it should be done!"*

**David Hughs, Ireland**
