SOUTH FRANCE Tour
2018

Join us from JUNE 13th, 2018
What do the **Holy Grail**, Mary Magdalene, The Da Vinci Code, **The Cathars and Templars**, Rennes-le-Château, The Golden Ratio, Alchemy, Pharaohs, Freemasons, ancient scrolls and modern physics all have in common? The only way to find out is to come to the South of France to explore and study with one of the leading experts in Ancient Mysteries, or you might just wish to come for the French food, wine, beautiful stone villages and countryside! Surrounded by pristine nature, we will be treated to healthy, hearty French meals and wine, and staying in gorgeous French boutique hotels.

For all lovers of French cuisine, good wine, ancient legends and mysterious stories, we have prepared a unique experience in Southern France based on over our 12 years of sponsoring tours and retreats in this part of the world. Nowhere is there an esoteric heritage as old or as rich as the exquisitely beautiful Languedoc and Catalan regions. Become acquainted with sacred Cathar sites, trace the legends of the Holy Grail, unravel The Da Vinci Code, follow the footprints of old alchemists and walk amongst the ancient standing stones and dolmens, all imbued with the mythology of Mary Magdalene.

Our timing is perfect, as on the grand finale of the tour, we will witness and partake in SAINT JOHN’S DAY Celebration in Catalan Occitania country and the Summer Solstice at on the famous Cathar Sun Temple Mt Segur!

We invite you to join us after the Breakthru-Technologies conference being held on June 8-11 at Lake Monbel, to begin our South France tour on June 13th. Arrive at Carcassonne on June 12th (why not take a few days in Paris then a train ride to Carcassonne). We will transfer you to Lake Monbel where the tour begins at 9am, 13th June.

This tour is sponsored and organized by Roger Green with leading researcher Eva Lenova and guests Ani Williams and Dan Winter.

Enquiries: info@Breakthru-Technologies.com

Explore and study the rich, esoteric heritage of the exquisitely beautiful Languedoc and Catalan regions.
ARRIVAL June 12
Arrive into Lake Monbel and stay the night (extra charge), or arrive early morning before 9am on June 13th.

DAY 1 June 13
Tour starts 9am
The famous Niaux caves; Connecting with the oldest temples of the Earth Goddess
• Ax les Thermes; The ancient spa town with 70°C water from the Pyrenees: rest and bathe
• Hotel Stay: Lake Monbel

The Divine Feminine called seekers here throughout the ages and this region was the most literate and cultured in Europe, with a distinctive language, vibrant court life and high degree of autonomy. The people of the Languedoc protected themselves in the 11th century in fortified villages called castra, built around a church or castle. These were places where peasants, artisans, merchants and knights met and socialized. Lords dispensed justice, Troubadours developed their art, and from the 12th century Cathars found a ready audience for their teachings.

Cave Niaux is famous for its ancient wall paintings and is one of the most famous decorated prehistoric caves in Europe. The cave extends for more than 2 km and will reveal more than 70 exceptional prehistoric paintings.

The spa own of Ax les Thermes has warm waters that gush from the Pyrenees. The therapeutic value is internationally recognized.
DAY 2 June 14

Theme: Working with energies of the land and the connection of old and new.

Hotel Stay: Lake Monbel

The Medieval town of Mirepoix and The Rock Church in Vals. In the heart of the village stands the church... at first sight, you could believe that this building, austere and solid, is only a citadel, a castle left by some local lords. However, as you explore and look to the hidden side of the edifice and climb towards the south-east you will discover what the old one’s call ‘the platform of Rahus’.

Carcassonne is at the crossing of two major traffic routes used since antiquity: from the Atlantic to the Mediterranean and from the Massif Central to Spain. The town is divided into two quite separate parts. The Cité occupies a plateau on the right bank of the Aude. The Bastide Saint-Louis lies on the left bank. The old district of la Trivalle and the famous Old Bridge have been, from that time, the links between their two destinies. Carcassonne has inherited 2,000 years of history and invites you to discover its heritage of fine monuments, to wonder, rest, dream, eat and drink.

Limoux: The Church with the Black Madonna, Jesus and the Mary Magdalene wedding image

"I found this group lit a fire in me to realize bliss. I thank Mother Earth for bringing this group together and may Mother Earth give the organizers a lot of energy to do many more such groups."

— C. Difesa
DAY 3 June 15

Theme: Castles, hermits and saints.

The Cathar Puivert castle. Legend has it that the town of Puivert welcomed a great gathering of troubadours in the 12th century. The instruments seen here are the bagpipes, flute, tambourine, rebec, lute, gittern, portable organ, psaltery and the bowed hurdy-gurdy. View the court of miracles, Eleanor of Aquitaine, Queen of three Kings and troubadour music.

Night in Port Vendres

We drive through the amazing Gorges du Calamus on our way to Mt. Bugarach, which is one of the highest mountains in France, reportedly the inspiration for the Devil’s Tower climax sequence in the science fiction film 'Close Encounters of the Third Kind'. The inactive volcano is used by Jules Vernes for his story 'Voyage to the Centre of the Earth'. Our journey takes you through the exciting and breathtaking Gorge of Calamus, heralded as one of the deepest and most beautiful gorges in the world. The winding road into the gorge takes us past spectacular stone pools and the spellbinding Gorge of Galamus chapel.

Mount Bugarach is the infamous center of all UFO activity in France. The inactive volcano is rumored to be both a passageway to a subterranean realm of extra-terrestrials and a landing site for UFOs, so that they might pick up pilgrims who have decoded the region’s mysteries! So be careful! You might be staying in a hotel on a different planet tonight.
DAY 4 June 16

**Theme:** Using the energies of the ley-lines: Abbeys and town gates

**Hotel stay in Port Vendres**

**Port Vendres, town of the Goddess Venus:** Port-Vendres is renowned for its numerous fish and seafood restaurants. It has been in existence since Iron Age times, when it was used as a harbor and later developed by the Romans, who called it Portus Veneris after the goddess Venus. There was a Temple of Venus nearby for the good fortune of mariners and since 1780 there has been a 30 meter high marble obelisk as a focal point of Port-Vendres.

**Perpignan,** the capital of Septimania. The lavish but short-lived Kingdom of Majorca transformed Perpignan into an important trading town. About 40 to 50 million years ago, a shift in the earth’s crust caused the uplifting of the Pyrénées, where warm seas were covered at the bottom with pieces of coral, plankton, sea-shells. A new landscape arose, in particular the Black Mountains. Over millions of years the river flowed over the mountains and extracted gravel and pieces of quartz. Out of this mixture of land and sea arose a unique stone: a limestone sown with many fragments of quartz.

**Serrabona,** the most famous Romanesque abbey in the county. The name of the monastery derives from the Catalan “serra bona”, meaning “good mountain”. Romanesque is an architectural style of medieval Europe characterized by semi-circular arches. It is known by its massive quality, thick walls, round arches, sturdy pillars, barrel vaults, large towers and decorative arcading. Each building has clearly defined forms, frequently of very regular, symmetrical plan; the overall appearance is one of simplicity when compared with the Gothic buildings that were to follow. It then developed in the 12th century into the Gothic style marked by pointed arches.
DAY 5 June 17

Theme: How the old christians used the energy of the land, temples older than we can imagine

St. Guilhem-le-desert. Hermitage of one of the famous authors of the medieval Holy Grail Knight’s legends

Cap Agde beach resort: Swimming in the sea in one of the most beautiful beaches in France

Narbonne Cathedral, one of the centres of heresy in South France

Night in le Vigan
The village has retained its medieval personality with old houses in amber stone, an ancient tower, and a shady square with a fountain and traditional plain trees. It sprawls organically along the Verdus stream, surrounded by cliffs, verdant with thyme, oak and pine trees. Saint-Guilhem-le-Désert is counted among the ‘Plus Beaux Villages’ (most beautiful villages) of France. It is home to numerous artists, many of whom may be found in their studios around the square. Overlooking the village, on the side of the cliff, is a castle of Visigoth origin. It was only ever a modest fortress but has attracted colourful stories involving Visigoths, Saracens and Troubadours. According to legend this castle was once the abode of a Saracen giant, called Don Juan, who was defeated in improbable circumstances by the eponymous Guilhem in single combat.

Cap d’Agde, France, is an enclosed self-contained village and resort, where often people are walking around in their birthday suit. Few places in the world are as unique as Cap d’Agde and this certainly is considered one of the best resorts of its type in the world for sunbathing in the buff. Few places in Europe or the world take the natural body as seriously or offer such a vast community of like-minded people.

Narbonne Cathedral, an important center of heresy in South France: The High Gothic style of the Cathedral of Saint-Just and Saint-Pasteur takes its inspiration from the great cathedrals of Northern France. Its most striking feature is its unique choir, with vaulting soaring to more than 40 metres. It was built between 1272 and 1340 and remained unfinished because, in those troubled times, the Consuls refused to demolish the ramparts to provide stone to continue building. The side chapel, dedicated to Our Lady of Bethlehem, has a 14th-century altar-piece in painted stone. The Treasury, also known as the acoustic hall, displays a rich collection of liturgical objects, including ivories, gold and tapestries.
DAY 6 June 18

Theme: Ancient technologies - stone circles, a perfect example of natural energy movement – the torus, how the water can speak to us – and the re-emergence of the River Vis

Night in le Vigan

Comments from Vincent Bridges: “The Causse de Blandas, the Blandas plateau, is from the Vigan with its ancient Isis spring and temple to the Cirque de Navacelle and its statue of the Virgin, encompasses one of the most amazing arrays of ancient megalithic sites in Europe, three large cromlechs, sun circles, and literally hundreds of menhirs and dolmen. These sites are virtually untouched and allow for a deep connection to the ancient megalithic landscape spirituality.”

Cirque de Navacelles waterfall, and walking up the hill with to the statue of the Virgine, with its golden egg in the middle of the crater, the navel of the world...

Megalithic sites in the western part of the plateau

Le Vigan: originally Vindomagus with Fountaine d'Is: The town gathered a little way below the great sacred spring that now supplies its fountains and runnels with limpid water, once dedicated to Isis, the Egyptian goddess, who was introduced into Rome and became fashionable. It is still called the Fontaine d'Is, and the bath and remains of her temple are under the present corn market.
DAY 7 June 19

Theme: Ancient technologies and swimming in pure nature energy

Night in le Vigan

Megalithic sites in the eastern part of the plateau: standing stones, stone circles and dolmens
Swimming in the river and waterfall

Grotte des Demoiselles: Welcome to the spectacular underground world of the Grotte des Demoiselles! (Cave of the fairies). The system of caves goes deep under the plateau of Blandas and is connected with many legends. Located in the heart of the Languedoc region, these limestone caves are host to a wide variety of unique mineral formations

Ganges the silk city. This town is famous for the cultivation of silkworms. Visit the local market and walk through the beautiful 17th century architecture of narrow streets and porches.

Dominating the Haute Vallée de l’Hérault, downstream from Ganges, the Grotte des Demoiselles, or Fairy Cave, is a magnificent and enchanting spectacle!
Day 8 June 20

**Theme:** Ancient technologies, megalithic sanctuaries, graves sites, and connection with "modern" Christian heritage

**Hotel stay in le Vigan**

**Megaliths around Minerve**
Between chapels and dry stone huts, between dolmens and menhirs, between mills and wash houses, an interesting heritage is to be discovered. The Minervois region was a megalithic civilization, especially between around 2500 and 1500 years BC. Around 50 dolmens and about 10 standing-stones are known. The name of the region comes from the medieval town Minerve, one of the most beautiful villages in France. The word ‘Menerbes” is from the celtic root ‘men’ for stone and ‘erb’ for country so literally ‘stony country.

**Wine tasting around Minerve.** Minervois is renowned for its wines, which you can enjoy as much as you like, because we do all the driving.

**Lodève and Saint Fulcran Cathedral** with magnificent glass windows. The edifice is a typical example of local Gothic architecture. Lodève is an ancient town of Celtic origin and sits at the foot of the mountains of the Languedoc-Roussillon region. The the cathedral has been classed a national historical monument.
Celebration of the Summer Solstice at Montsegur

Theme The temple of Sun and how it was used by Cathars, our time meeting the old times

We witness this special gathering at the sacred Cathar mountain stronghold Montsegur.

Hotel stay in Prades

The ruins of Montsegur are perched at a precarious 1,207m altitude in the heart of France’s Languedoc-Midi-Pyrenees regions. Montsegur dominates a rock formation known as ‘a pog’ a term derived from the local Occitan dialect meaning peak or mountain. In 1243-1244 the Cathars were besieged at Mont Segur by 10,000 Royal Catholic French troops. In March of 1244, the castle finally surrendered and the Cathar defenders were burned en masse in a bonfire at the foot of the pog. However, in the days prior to the fall of the fortress, several Cathars allegedly slipped through the French lines carrying away a mysterious ‘treasure’ with them. While the nature and fate of this treasure has never been identified there has been much speculation that it could have easily been the Holy Grail.

Every year the locals gather with an international group to celebrate the Cathar bravery of stepping into the Fire, rather than surrender their deeply held beliefs to the Catholic powers of the time.

The Bons Hommes, as the Cathars called themselves, created one of the most remarkable and enigmatic spiritual movements of the Middle Ages, the destruction of which was one of the great tragedies of European religious life.

Languedoc, along with the neighboring domains of Catalonia and Provence, is filled with culture and spiritual history. It is a region that carries significance for the medieval Grail stories and is imbued with the mythology of Mary Magdalene. The Troubadours were the first to bring romantic love to the Western world in poetry and song of great elegance and charm that expressed a new merging of the erotic and the mystical.
10 June 22

Theme: *Connections with mysterious legends, stories, and concert with Ani Williams*

**Rennes-le-Chateau (the famous village of the Da Vinci code)**

Rennes-le-Bain village and Roman spa.

We will meet the local Templars who give us some explanation about the place and its legends

Night in Prades

**Concert with Ani Williams (American musician)**

Ani Williams is a harpist, singer, author and sound therapist. She has performed worldwide since the 1980s and has recorded more than 24 albums of original music based on ancient spiritual traditions. She has done seminal research in sound healing and the relationship between musical tones, the human voice and healing and she is a practitioner and lecturer on Hermetic Sound Alchemy.

**Rennes-le-Chateau (the famous village of the Da Vinci code)**

**Introduction**

The village church dedicated to Saint Mary Magdalene has been rebuilt several times. This survived in poor repair until the 19th century, when it was renovated by the local priest, Bérenger Saunière. One of the new elements was the Latin inscription 'Terribilis est locus iste' above the front doors, taken from the Common Dedication of a Church, which translates as: "This is a place of awe". A devil like figure holding up the holy water soup is a rare and unusual choice for the interior decoration of a Church but not exclusive to the Church of Saint Mary Magdalene.

Believers in the enigma have suggested that Saunière's estate was set up on a large-scale checkerboard, while others have claimed that Saunière produced a Mirror image of selected architectural features of his property. They also allege that Maurice Barrès's novels *Roman à clef* and *The Sacred Hill* are largely based on the Rennes-le-Château story involving Bérenger Saunière (while novels by Jules Verne are cited to show that the enigma predates Abbé Saunière). All in all folks, a very deep mystery, retold by our teachers and expert in the village itself!

The village received up to around 100,000 tourists each year at the height of popularity of Dan Brown's bestselling novel *The Da Vinci Code*. The modern reputation of Rennes-le-Château rises mainly from claims and stories dating from the mid-1950s concerning the local 19th-century priest Father Bérenger Saunière. These stories influenced the authors of the worldwide bestseller *The Holy Blood and the Holy Grail* in 1982, whom one of the authors Henry Lincoln we have sponsored many times to talk to our study tour members. This work in turn influenced Dan Brown when he wrote *The Da Vinci Code*, published in 2003.

There are many stories about the ‘parchments’ allegedly discovered by the priest Bérenger Saunière alluding to the survival of the line of Dagobert II. Books alleged that the Priory of Sion guarded the Merovingian dynasty’s bloodline, that the dynasty descended from a supposed marriage of Jesus Christ and Mary Magdalene and Bérenger Saunière allegedly discovered that secret and amassed his wealth by blackmailing of the Holy See. Do we dismiss all of the popular
allegations as pseudo-history? Come and find out for yourself!

For those serious students of the Knights Templar, early Christianity, the Holy Blood, Holy Grail, the Da Vinci code and the Prieure de Sion and the hidden secrets of the Berenger Sauniere Parchments, the mysteries of Rennes-le-Chateau (where many of our study tours have been for last 10 years), The Grail, the Ark, the Emerald Tablet, The Merovingian Royal Blood line of Europe, the blood line of King Arthur, Sacred Geometry and meanings of the landscape, the secrets of alchemy and the philosophers stone, Nostradamus, John Dee, Shakespeare and the secret identity of Edward Kelley, Freemasons and the The Occult Roots of Christianity, The Cross of Lorraine, Hiram-King of Tyre, the Temple of Solomon, world mythology, and Judeo-Christian scriptures. This epic retelling of the real history of Earth has become a hallmark of the study tours with Roger and Eva and colleagues Dan Winter and the late Vincent Bridges.

Due to the popularity of the Da Vinci Code the subject of Mary Magdalene has been covered in Time Magazine, Newsweek, on The History Channel, the Learning Channel and in specials aired on major TV networks, including dozens of books on the topic. By the way, the village has a great bookstore!

Rennes-les-Bains An adjacent village to Rennes-le-Chateau, Rennes-les-Bains is home to a renowned hot springs and the mysterious Fauteuil du Diable (The Devil's Armchair), a large boulder carved in the shape of a throne. Both the Devil’s Armchair and the nearby spring figure strongly in the mystery of Rennes-le-Chateau, The Da Vinci Code, and the secret location of the Holy Grail. We particularly note the pent Golden Ratio symmetry in the star maps of Rennes and others in the region.
Lecture and Discussion with Dan Winter

How and why did the Holy Grail come to be located in the South of France? Why were Rennes-le-Château and all the regional magnetics profoundly manipulated to be five-sided? How does this compression symmetry create fertility and biologic vitality, feed DNA and ultimately enable bliss and lucid dreaming? How and why did the ancient Celts arrange the Dolmen in this format - the only geometry that could feed their blood? Imagine the drama we feel while standing in Sauniere’s home at the Rennes Mygdala tower - knowing now why the scroll he discovered was the ultimate blackmail document, not just for the church, but for all the royal families of Europe who had conspired to put the "Disposyni" out of power. We bring into play Sir Gardner’s ‘Genesis of the Grail Kings’ and the Annunaki origins of kingship - up to the present political dramas.

We will discuss Boudet's text on the origin of the Celtic language and the importance of symmetry to this ancient language of the bloodlines. We will learn how the charge compression of the sacred sites that we visit can be measured and observed to cause our blood to electrically "sing": the real SanGraal. Moreover, we will discuss how this becomes the measureable origin of life force. From here we will introduce the blood survival symmetry knowledge of the ancient Dragon cultures (Celtic and Annunaki) which planted these Dolmen and attracted the Black (Rigelian) Madonna story.

Referencing everything from MAG Dragon Queens to messiahs, to the Reverent Mothers of Frank Herbert’s 'Dune', we tell the full story in a day-long drama. This epic retelling of the real history of genes on Earth has become a growing hallmark of the advanced courses within the Sacred Geometry world tours. The telling of this story is gripping - and always evokes more excitement than we can handle in one day. Whether it’s Jedi Knights checking for chloridians (implosion) in the blood, or Montauk checking for Boson Seven in DNA harmonics, or Tolkien checking to see if the Finnish/Draconic alphabet has produced the Lord of the Ring, the message is the same in your DNA. The dynamics of your blood and its ability to receive charge in a fractal - The Holy Grail - determine if you become (toroidal DNA) the Lord of the Ring.
"This has been a sublime blend between the science of coherence, bliss and fractality with the lived life experience of all aspects of the program. It turns out that this program has been a path of initiation as much as a teaching program. I wholeheartedly recommend this inspirational tour to all who feel the inclination to come." — John Hare
DAY 11 June 23 Saint John’s Day

**Theme:** Using the energy of the land, explore the torus design at du Cuxa

Take in the air of Mount Canigou and the Pyrenees.

**St. John’s Fires Celebration** - held only once per year –in the foothills of Mt Cangou

**St. Michel du Cuxa- Lecture** and tour with Dan Winter

Night in Prades

Our timing is PERFECT. This event is only held once per year: The Fête de la St Jean, celebration of the summer solstice and a Catalan tradition. Each village sends its delegation on the Sunday preceding the Saint Jean. The group takes a bundle of sticks up to the peak, in the name of its village and lays it at the bottom of the Canigo’s cross. This celebration is accompanied by the St Jean bouquet that is composed of four specific herbs picked on the morning of the 23rd. Tradition requires walnut, St John’s Wort, Helichrysum and Stonecrop leaves. These bunches are sometimes still hung on house doors to attract luck and happiness.

From the village of Taurinya we will venture to one of the loveliest abbeys in the country, Saint-Michel-de-Cuxa, founded by the Benedictines in about 840, located at the foot of Mount Canigou in the northeast Pyrenees. A community of Benedictine monks continued the monastic life which began 11 centuries ago. Parts of it now makes up The Cloisters museum in New York City, founded by John D Rockerfellow. The warm beauty of the native pink marble used at Cuxa harmonizes this cloister’s many elements, such as the varied capital sculptures carved during different periods in its construction and its beautiful crenellated tower silhouetted against the wooded slopes of Canigou. It will inspire a sense of wonder and mystery in all who visit. So too does the bare stone crypt within. You will experience the powerful magnetism of the village of Taurinya as we visit the stone crypt beneath the cathedral in the shape of the Torus Donut. (Feeling your hair stand up from charge compression inside - is a good experiential intro to Toroidal Sacred Geometry!). It is from this very crypt that the town of Taurinya takes its name. A highlight is this extraordinary torus architecture, wonderful for chanting, located in the underground chapel and designed with a huge central pillar. A very interesting day accompanied by Dan Winter in a beautiful, peaceful location.

**Canigou Swim of a Lifetime** If conditions permit, we are planning a visit to the world’s greatest gorge/cascade swimming hole just up the dramatic Canigou from the cathedral and tiny village - a short hike you will NEVER forget!

DAY 12 June 24

Tour ends at breakfast in Prades

Your own transfer back to home or onwards for more adventure. Transfer can be provided to nearest train or bus stations free of charge, eg: Perpignan, where there are regular trains to Paris and Barcelona.
EVA’s life-long interest in history, traditions, wisdom, art and the science of our ancestors and fascination with metaphysics formed a good base from which she was able to start her five years of working and studying with American historian, Vincent Bridges. She supported him in his search for evidence and resources for his books, guided him to places connected to his work in Czech, and interpreted and helped to organize numerous seminars, workshops, lectures and pilgrimages both in Czech and abroad. Their alchemical walks in Prague were rather popular, a number of sacred geometry students enjoyed their magical rituals in the church at Zelena Hora as well as the labyrinth workshop near Cesky Krumlov. An enthusiastic group participated in the winter solstice 2012 ritual in Prague and a bunch of adventurers joined them to their South France tours (Gypsy festival in Stes-Maries-de-la-Mer, Nostradamus, Grail Quest and Cathars in October 2010 and May 2012) and to their last public event - Moravian Michael-and-Mary lay line pilgrimage, as Vincent loved to call it. Eva continues guiding groups of people to power places, leads rituals, organizes pilgrimages and tours to traditional festivals, on special occasions or with special themes such as South France ‘in the footsteps of the Magdalenes’. She is a member of the Czech Academy of Healing Nutrition team writing articles, teaching practical classes and guiding trips.

MR. GREEN is a pioneer in modern day Natural Healthcare incorporating both eastern and western themes, having presented in over 70 countries. He is the Founder of the Academy Healing Nutrition based in NYC, a 30-year curriculum specializing in food and herbs as medicine, where he has assisted thousands in their recovery from disease through natural healing methods. He is a co-founder and director of the Prague and London Academy of Healing Nutrition. He is the Director of the Academy Sacred Geometry. He has sponsored dozens of special and unique educational events, including study tours to China, Tibet, Peru and India, over 14 International Conferences in Sacred Geometry, Feng Shui and Ecology, retreats and tours of South France and the Alchemy of Prague celebrations. He was a pioneer of Classical Feng Shui in the West and has sponsored many Eco-design events and tours. In 2008, he founded the Breakthru-Technologies Company, which is moving forward several projects including: The Theraphi Wellness Device, used for treatments for natural pain relief and other ailments, Waste to Energy technology (prototype built), Ecat Technology (cold Fusion), the supplement ‘Telostep’ that increases the length of ‘telomeres’, the ‘Bloom the Desert’ project, the Fractal Wave Software for stock market analysis and an ‘Ormes’ based agricultural product called Sea Jing. He is an agent for the newly released Kholo Longevity formula development by world famous medical researcher Dr Marco Ruggiero.

ANI has performed worldwide since the 1980s and has recorded more than 24 albums of original music based an ancient spiritual traditions. She has done seminal research in sound healing and the relationship between musical tones, the human voice and healing. In 1994 Williams founded Songaia Sound Medicine and is a practitioner and lecturer on Hermetic Sound Alchemy, the mirroring of the song of the stars in the human energy field. She presents seminars and trainings in Europe, Mexico and the United States and her writings have been published in numerous international magazines and in three books.

DAN has a hugely diverse background in physics and electrical engineering. He has created breakthroughs in science with his Fractal Field applications into bio-magnetic coherent fields, of which he is a leading pioneer. Dan is well known for being the first to announce Golden Ratio Fractality as the Electric Cause of Gravity. He presented & published his theory at the Budapest International Unified Field Conference in 2006. The Paper is supported by the mathematics of El Naschie, a world famous mathematician and an expert in the golden mean ratio. The Golden Ratio, which appears in the geometry of a variety of creations in Nature, is found to arise right in the Bohr radius of the hydrogen atom due to the opposite charges of the electron and proton.
Please note:
The sponsors have the right to change the program and adjusted it to each day’s situation.
Our intention is to have quick lunches, with snacks/café and to make the evening the main meal of the day.
Some hotel locations might change due to availability (from time of publishing).
Overall the pace is relaxing, and adjustments are made based on group consensus.

HOW TO GET THERE
Most people will fly into Paris (perhaps take the opportunity for a few days sightseeing) then take the regular scheduled trains to Carcassonne (allow 6 hours for this train journey).
Carcassonne Airport has cheap flights from London and other airports, especially by Ryan Air.
We will meet at Carcassonne Airport and transfer you to the lovely boutique country hotel in Lake Monbel.
If you are traveling by car or arriving at Carcassonne train station, forward your details and arrangements will be made for you.

NOTES
• Tour starts at 9am, 13th June at Lake Monbel
• Tour price does not include accommodation for June 12th (60 Euros)
• Accommodation is based on shared rooms of couples or same sex to each room- very comfortable.
• Single rooms are available but limited, first in first served — so be quick.
• There is a 500 E fee for single rooms supplement
• BE QUICK AND BOOK EARLY so you are not disappointed.

This is a very popular season of the year to be in South France

FEES
• Price for all 11 days EUR 2500 in a double room and EUR 3000 in a single room.
• Price includes hotel, breakfast, tours, transport, lectures and concerts and transfer to Lake Monbel.
• Entrance fees and food (lunch/dinner not included
• For shorter versions which can be arranged i.e. based on 280 EUR/day person.

Payment options
• By bank transfer to USD account
• Euro to USD currency exchange is done on day of booking
• Payment by credit card and PayPal available with 3 % bank charges added

Early Payment
Above fees are based on either full payment or non-refundable deposit of $600 received by 1st May.
